

Jaffna Medical Association

Author Guidelines

The *Jaffna Medical Journal's* mission is to stimulate, encourage and empower doctors, researchers and other health professionals to publish high quality research in order to promote evidence based medicine and improve health care.

Conflict of interests

The *Jaffna Medical Journal* requires that all authors declare any relevant financial and non-financial conflicts of interest and the journal publishes those that might influence a reader's perception of the paper alongside the paper. The *Jaffna Medical Journal* requires that all funding sources of the research are declared and published and the role of the funding source in the conception, conduct, analysis and reporting of the research is stated and published.

TYPES OF ARTICLES

The *JMJ* publishes a wide variety of articles which have relevance to medicine and allied sciences.

Leading articles

Leading articles are solicited by the editors, and are expert opinions on current topics or commentaries on other papers published in the *JMJ*. They do not usually exceed 1500 words or have more than 20 references. Tables and illustrations are usually not included in leading articles.

Original articles

Original articles report the results of original research, systematic reviews and meta-analyses. Observational studies (cohort, case-control, or cross-sectional designs) must be reported according to the STROBE statement. Systematic reviews and meta-analyses must be reported according to PRISMA guidelines. Reports of randomised trials must conform to CONSORT 2010 guidelines. Diagnostic accuracy studies must report according to the STARD guidelines. The guidelines on reporting sex and gender information (SAGER) should also be considered. Original articles should have less than 2500 words, 5 tables / illustrations and should include a structured abstract of less than 250 words.

Brief reports

This category includes preliminary reports, novel patient management methods, and reports of new techniques and devices. They should be limited to 1000 words, 3 tables/illustrations and 10 references, and should include an unstructured abstract of less than 100 words.

Case reports

Acceptance of case reports is based strictly on originality and whether there is an important new lesson to be learnt or a new message from the report. It should not contain more than 750 words, one table /

illustration and 5 references. Authorship should be limited to five. Case reports may be accepted as contributions to the picture-story series (not more than 300 words of text, 3 references and 2-3 clear black and white or colour photographs). Case reports must be prepared according to the Consensus-based Clinical Case Reporting (CARE) guidelines.

Letters

The *JMJ* will also consider for publication letters (less than 400 words, maximum of 3 authors, and maximum of 5 references). These may be in response to a recently published article or a short freestanding piece expressing an opinion.

ETHICAL RESPONSIBILITIES

Criteria for authorship

Only persons who contributed to the intellectual content of the paper should be listed as authors. According to the ICMJE recommendations authorship should be based on the following 4 criteria:

- Substantial contributions to the conception or design of the work; or the acquisition, analysis, or interpretation of data for the work; AND
- Drafting the work or revising it critically for important intellectual content; AND
- Final approval of the version to be published; AND
- Agreement to be accountable for all aspects of the work in ensuring that questions related to the accuracy or integrity of any part of the work are appropriately investigated and resolved.

In addition to being accountable for the parts of the work he or she has done, an author should be able to identify which co-authors are responsible for specific other parts of the work. In addition, authors should have confidence in the integrity of the contributions of their co-authors.

All those designated as authors should meet all four criteria for authorship, and all who meet the four criteria should be identified as authors. Contributors who meet fewer than all 4 of the above criteria for authorship should not be listed as authors, but they should be acknowledged.

Previous publication

In the cover letter give full details on any possible previous publication of any content of the paper. (e.g.)

1. Reworked data already reported.
2. Patients in a study already described and published.
3. Content already published or to be published in another format.

Previous publication of some content of a paper does not necessarily preclude it being published in the *JMJ*, but the editors need this information when deciding how to make efficient use of space in the journal, and regard failure of a full disclosure by authors of possible prior publication as a breach of scientific ethics.

Ethics Approval

For studies involving human participants a statement detailing ethics approval and consent should be included in the methods section. Every research article should include a statement that the study obtained ethics approval (or a statement that it was not required and why), including the name of the ethics committee(s) or institutional review board(s), the number/ID of the approval(s), and a statement that participants gave informed consent before taking part. Proof of approval from an ethics committee must be provided on submission of the manuscript. All clinical trials should be registered in an internationally recognized Clinical Trials Registry and authors should submit the Trial Registration Number along with the manuscript.

For case reports, signed consent by the patients must be submitted with the manuscript. If the person described in the case report has died, then consent for publication must be sought from their next of

kin. If the individual described in the case report is a minor, or unable to provide consent, then consent must be sought from their parents or legal guardians.

If consent cannot be obtained because the patient cannot be traced then publication will be possible only if the information can be sufficiently anonymised. Anonymisation means that neither the patient nor anyone else could identify the patient with certainty.

SUBMITTING MANUSCRIPT

Cover letter

Manuscripts should be submitted with a letter stating

1. that the contents have not been published elsewhere;
2. that the paper is not being submitted elsewhere (or provide information on previous publication);
3. the contributorship, competing interests, data sharing and ethical approval

The letter should acknowledge any potential conflict of interest (see Ethical Responsibilities above) and call the editors' attention to any possible overlap with prior publications. Include the name, full mailing address, telephone number and e mail address of the corresponding author.

Submit an original copy and 3 copies (photocopies are acceptable) of all parts of the manuscript.

The manuscript should be mailed, with adequate protection for figures, to the Editor, Jaffna Medical Journal, Jaffna Medical Library, Teaching Hospital, Jaffna

Manuscripts could also be submitted directly at the Jaffna Medical Library at the Teaching Hospital, Jaffna.

Author fees

No fee is charged from the authors

PREPARATION OF MANUSCRIPT

The *JMJ* will consider all manuscripts prepared in accordance with the uniform requirements for manuscripts submitted to biomedical journals developed by the International Committee of Medical Journal Editors. A summary of these and the requirements of the *JMJ* are given below.

Manuscript typing

All parts of manuscript, including tables and figure legends, must be typed with double spacing. The computer language must be set to English (UK).

References must also be double spaced. Manuscripts should be typed in capital and lower case letters, on white paper of A4 size (212x 297 mm).

Arrange components in the following order: title page, abstract, text, references, tables in numerical sequence, and figures in numerical sequence. Begin each component on a separate page.

Number all pages consecutively, starting with the title page.

Abbreviations and symbols

Use only standard abbreviations; use of nonstandard abbreviations can be confusing to readers. Avoid abbreviations in the title of the manuscript. The spelled-out abbreviation followed by the abbreviation in parenthesis should be used on first mention unless the abbreviation is a standard unit of measurement.

Title page

The title page should contain the following:

1. Main title, running title (less than 50 characters) and a maximum of 5 index words(or phrases).

2. Authors listed in the order in which they are to appear in the published article. **List authors names as surname and maximum of 2 initials.**
3. Institutional affiliation for each author and e mail address. The institutions listed should reflect the affiliations of the authors at the time of the study, not their present affiliations, if they differ.
4. Name, address, e-mail and telephone number of author responsible for correspondence.
5. Source(s) of support. These include grants, equipment, drugs, and/or other support that facilitated conduct of the work described in the article or the writing of the article itself.
6. In addition to submitting a Declaration Form, include a conflict of interest statement which describes authors' conflicts of interest, sources of support for the work including sponsor names and whether the authors had access to the study data. This statement should be signed by all authors.
7. The number of words in the manuscript, exclusive of the abstract, acknowledgments, references, tables, figures, and figure legends.

Abstract

The abstract should provide the context or background for the study and should state the study's purpose, basic procedures (selection of study participants, settings, measurements, analytical methods), main findings (giving specific effect sizes and their statistical and clinical significance, if possible), and principal conclusions. Clinical trial abstracts should include items that the CONSORT group has identified as essential. Clinical trials should give clinical trial registration number at the end of the abstract. Authors are recommended to consult the SAGER guidelines for the reporting of sex and gender information. Abstract should include the sub-headings: Introduction, Objectives, Methods, Results and Conclusions. Number of words should be less than 250 words. Brief Reports should have an unstructured abstract limited to 150 words.

Main text

The text should contain the following categories;

- Introduction
- Methods
- Results
- Discussion
- Acknowledgements
- Conflicts of Interests
- References
- Tables and Figures

Under a subheading "Conflicts of Interests ", all authors must disclose any financial and personal relationships with other people or organisations that could inappropriately influence (bias) their work. If there are no conflicts of interest, authors should state that "There are no conflicts of interest".

References

Number references in the order in which they are first cited in the text.

Use Arabic numerals within parentheses e.g. [2].

Note that from 2018 the *JMJ* requires the PubMed abbreviation of the journal title (or a similar abbreviation if the journal is not indexed in PubMed) NOT the COMPLETE name of journal. Include year, volume and first and last page numbers.

References to articles or books accepted for publication but not yet published must include the title of the journal (or name of the publisher) and the year of expected publication.

Unpublished work (personal communication) may be cited by inserting a reference within parentheses in the text; authors must submit a letter of permission from the cited persons to cite such communications.

Sample references below are in the style required by the *JMJ*.

Journal articles

Jayatissa R, Gunathilaka MM, Fernando DN. Iodine nutrition status among school children after salt iodisation. *Ceylon Med J* 2005; **50**: 144-6.

List all authors when 6 or fewer; when more than 6 list only the first 3 and add *et al*.

Books

List all authors when 6 or fewer; when more than 6 list only the first 3 and add *et al*.

1. Author.
Eisen HN. *Immunology: An Introduction to Molecular and Cellular Principles of the Immune Response*. 5th ed. New York: Harper and Row, 1974.
2. Editors.
Dausset J, Colombani J, eds. *Histocompatibility Testing* 1972. Copenhagen: Munksgaard, 1973.
3. Chapter in a book.
Hellstrom I, Helstrom KE. Lymphocyte-mediated cytotoxic reactions and blocking serum factors in tumor-bearing individuals. In: Brent L, Holbrow J, eds. *Progress in Immunology* II. v. 5. New York: American Elsevier, 1974: 147–57.

Websites

Preminger GM, Tiselius HG, Assimos DG, *et al*. Guideline for the management of ureteral calculi. American Urological Association, 2007. <http://www.auanet.org/education/guidelines/ureteralcalculi> (accessed on Feb 20, 2013)

Tables

All tables must be typed double-spaced. Tables should be numbered with Arabic numerals, in the order in which they are cited in the text. A table title should describe concisely the content of the table.

Figures and illustrations

Figures or illustrations should be professionally drawn or prepared digitally. A high resolution (300dpi) digital copy of the figure or illustration should be submitted. Lettering should be uniform in style. Free hand or typewritten lettering is not acceptable. Number the figures in the order in which they are cited in the text.

PRE-SUBMISSION CHECKLIST

In order to reduce the chance of your manuscript being returned to you, please check:

Author information: Have you provided details of all of your co-authors?

Manuscript length and formatting: Is text double-spaced? Does it use a 12-point Times New Roman font; employs italics, rather than underlining (except with URL addresses)? Have you checked that your manuscript doesn't exceed the requirements for word count, number of tables and/or figures, and number of references? Have you provided your abstract in the correct format? Have you supplied any required additional information for your article type?

Tables: Have they been cited in the text? Have you provided appropriate table legends?

Figures: Have you uploaded any figures separately from the text? Have they been supplied in an acceptable format and are they of sufficient quality? Have the files been labeled appropriately? Have the figures been cited in the text? Have you provided appropriate figure legends?

References: Have all of the references been cited in the text? Is it in the correct style required for the *JMJ*?

Statements: Have you included the necessary statements relating to contributorship, conflicts of interests, data sharing, clinical trial registration and ethical approval? The submission has not been previously published, nor is it before another journal for consideration (or an explanation has been provided in Comments to the Editor).

Research reporting checklists: Have you either provided the appropriate statement for your study type, or explained why a checklist isn't required?

Permissions: Have you obtained from the copyright holder to re-use any previously published material? Has the source been acknowledged?

Reviewers: Have you provided the names of any preferred and non-preferred reviewers?
